Master List of Systems and Initiatives

The Master List of Systems and Initiatives contains tables of key systems and initiatives, other systems that are not directly related to Enterprise or Component priorities, and Components that are users of Enterprise and Component systems. The content of the Master List tables changed based on the most recent input from BEP representatives and Components.

NOTE: In the September 2005 iteration of the ETP, the Master List appeared as Appendix F. Appendix F now contains Component system and initiative tables.

EXAMPLE

Table I: Key Systems & Initiatives

This table contains the list of DoD Enterprise-level and Component-level systems and initiatives supporting BEPs and Component priorities. In the few cases where the name of the program is not the same as the system, both are listed and the association is footnoted. The table contains columns that provide high-level categorization of each system or initiative.

The following chart is a small, representative sample of the Key Systems & Initiatives. Most of the headings are self-explanatory, except as indicated below.

These columns indicate the primary BEP for Enterprise Level Systems and Initiatives and therefore list only one. Component Level Systems and Initiatives may list one or more BEP (in no priority order) and one or more Component Priority in the following column.

These columns indicated if a system or initiative is a Program and shows the Parent Program.

Systems highlighted in yellow indicate systems that will implement an Enterprise or Component Initiative.

DITPR ID	NDAA Category	System/ Initiative Acronym	System / Initiative Name	Transition Level Enterprise / Component	System / Initiative	Certification Authority	Lead CBM	Component	BEP Priority	Component Priority (Note 5)	Program	Parent Program
167	Modify	ACES	Automated Civil Engineer System	Component	System	AT&L	RPILM	Air Force	RPA FV	AF1 AF2 AF3	Yes	ACES
36	Modify	ADS Note 1	Automated Disbursing System	Component	System	Comptroller	FM	DFAS	FV	DFAS2	No	DDHPO
126	New	AHLTA	Armed Forces Healthcare Longitudinal Technology Application	Enterprise	System	P&R	HRM	TMA	PV	-	Yes	AHLTA
304	New	AIT	Automated Identification Technology	Component	Initiative	AT&L	WSLM/MSSM	Navy	PV AV MV FV	NAVY2	Yes	AIT
5215	New	BEIS	Business Enterprise Information System	Enterprise	System	Comptroller	FM	BTA	FV	-	Yes	BEIS
869	New	CAMS-ME Note 2	Capital Asset Management System - Military Equipment	Enterprise	System	AT&L	WSLM/MSSM	OSD	MV	-	No	MEV

Table II: Other Systems

This table lists systems that will be part of the target environment, but are not directly related to Enterprise or Component priorities. The systems listed in this table (a small sample of which appears below) come from one of the following sources:

1. FIAR: Financial Improvement & Audit Readiness Plan
2. BEA SV-1: Systems shown as interfaced to DoD Enterprise-level systems in BEA 3.1
3. Component Transformation Plans - other significant Component systems that are not considered to be transformational.

The column heading "Identified Source of System Information" lists "FIAR" if the system is from the FIAR, "SV-1" if the system is from the BEA 3.1, SV-1, or lists the specific component name if the system is from one of the Component transformation plans. See page F-2 for a sample of Table II: Other Systems.

Listing of Systems that are part of the Target Environment that are not DoD Enterprise or Component Priority Programs				
System Acronym	**System Name**	**Identified Source of System Information**	**DITPR ID**	**ITMA**
AMP	Analysis of Mobility Platform	USTRANCOM	487	6492
A-PLUS (Note 1)	Acquisition Program List Uniform Synopsis	SV-1	DITPR ID Pending	
AROWS	Air National Guard Order Writing System	FIAR	879	-
DCPS	Defense Civilian Pay System	FIAR, DFAS	93	0572
DMAPS	Depot Maintenance Accounting and Production System	Air Force	200	6962
DOORS (SMC)	Dynamic Object Oriented Requirement System (SMC)	SV-1	5856	-
DPD-DW (Note 3)	Defense Programming Database - Data Warehouse	SV-1	DITPR ID Pending	

Table III: Using Components – Enterprise Level Systems

This table contains a <u>matrix</u> that identifies the primary customers (using Components) of each DoD <u>Enterprise</u> system. Values within the matrix include:

- "**C**" if the Component is "Currently" using the system
- "**F**" if the Component will use the system in the "Future", but is not currently using the system, and
- "**C/F**" if the Component is "Currently" using the system and plans to use the system in the "Future"
- "**Blank**" if the Component is not currently using the system and has no plans to use it in the future

The example below is a partial view of the matrix.

Enterprise Customers	American Forces Information Service (AFIS)	Defense Advanced Research Projects Agency (DARPA)	Defense Commissary Agency (DECA)	Defense Contract Audit Agency (DCAA)	Defense Contract Management Agency (DCMA)	Defense Finance and Accounting Service (DFAS)	Defense Information Systems Agency (DISA)	Defense Intelligence Agency (DIA)	Defense Legal Services Agency (DLSA)	Defense Logistics Agency (DLA)	Defense Prisoner of War/Missing Personnel Office (DPMO)	Defense Security Cooperation Agency (DSCA)	Defense Security Service (DSS)	Defense Threat Reduction Agency (DTRA)	Department of Defense Education Activity (DoDEA)	DoD Human Resources Activity (DoDHRA)	Missile Defense Agency	National Imagery Agency

DITPR ID	NDAA Category	System/ Initiative Acronym	System / Initiative Name	Transition Level Enterprise / Component	System / Initiative	Certification Authority	Lead CBM	Component	BEP Priority	Component Priority (Note 5)	Program	Parent Program

Note 1 ADS is the system that is implementing the DLA DDHPO initiative.

Note 2 CAMS-ME is the system that is implementing the Materiel Visibility MEV initiative.

Note 3 CCaR & SMART are both systems that are implementing the Air Force PM&O initiative.

Note 4 CSE is the system that is implementing the Air Force Test & Evaluation Initiative.

Note 5 Each of the Components have identified priorities that are defined in the Component Priority Tables located in Appendix F.

System / Initiative Counts

	Systems	Initiatives	Total
Enterprise	24	16	40
Component	44	16	60
Total	68	32	100
Personnel Visibility	4	0	4
Acquisition Visibility	2	0	2
Common Supplier Engagement	15	4	19
Materiel Visibility	1	4	5
Real Property Accountability	0	5	5
Financial Visibility	2	3	5
Total	24	16	40
Air Force	14	8	22
Army	16	0	16
DFAS	1	2	3
DLA	7	2	9
Navy	5	4	9
USTRANSCOM	1	0	1
Total	44	16	60

Component Priority Table		
Component	**Priority ID**	**Priorities**
Army	ARMY1	Improve Processes: Manning, Readiness, and Well-Being of the Force
Army	ARMY2	Improve Business Practices/Processes: Paying the Force and Financial Accountability
Army	ARMY3	Improve Processes to rapidly Equip the Force
Army	ARMY4	Sustain the Force: Enhance Joint Logistics/Focused Logistics
Army	ARMY5	Improve Capability for Stability Operations.
Navy	NAVY1	Creating a seamless infrastructure
Navy	NAVY2	Creating optimized processes and integrated systems
Navy	NAVY3	Optimizing Resources
Navy	NAVY4	Implementing web-based capabilities
Navy	NAVY5	Aligning for Enterprise transformation
Air Force	AF1	Global synchronization of supply chain (people, materiel, installations) & integration with the Operations community
Air Force	AF2	Better Merge Mission Profiles Supplies, Equipment and People
Air Force	AF3	Focus on real-time command & control, decision support & predictive analysis
Air Force	AF4	Leverage spend activities & more effectively use industrial partners
Air Force	AF5	Focus on delivery of Commanders' resource management capabilities vs. low value-added transactional activity
Air Force	AF6	Re-engineer, share service organizations, standardize processes, regionalize support & deliver services globally
Air Force	AF7	Treat people as the most important resource
Air Force	AF8	Change culture to optimize performance of enterprise (Align goals & metrics to focus on enterprise performance, continuous improvement.)
Air Force	AF9	Instill more discipline & credibility in development & delivery of capabilities
DLA	DLA1	Customers: Provide responsive, integrated best value supplies and services consistently to our customers.
DLA	DLA2	Internal Processes: Develop and institutionalize the internal processes required to deliver value-added logistics solutions to the warfighter.
DLA	DLA3	Workforce: Enable and empower to deliver and sustain logistics excellence.
DLA	DLA4	Resources: Manage DLA resources for best customer value.
USTRANSCOM	USTC1	E2E Priorities: - Improve our Command's ability to deploy joint theater logistics Command and Control (movements, distribution) - Improve asset visibility and enable smoother distribution processes by capitalizing on automated IT
USTRANSCOM	USTC2	IT Priorities: - Maximize distribution effectiveness in support of the warfighter by providing optimized E2E Joint Deployment and Distribution IT capabilities
USTRANSCOM	USTC3	Financial Priorities: - Develop financial IT systems that consolidate and replace legacy systems, are CFO compliant, and provide superior data control and accountability
USTRANSCOM	USTC4	Execution Priorities: - Attain 100% TAV and ITV of all materiel and forces - Standardize aerial and surface port IT and communications capabilities
DFAS	DFAS1	Reduce the number of urgent military pay problems
DFAS	DFAS2	Improve financial performance by automating manual processes and eliminating redundancies
DFAS	DFAS3	Expand Electronic Commerce (EC) capabilities

	Listing of Systems that are part of the Target Environment that are not DoD Enterprise or Component Priority Programs

Notes:
1. A-PLUS - The Assistant Secretary of Defense (NII) software tool, Acquisition Program List Uniform Synopsis (A-Plus), is a web application that provides program status, Acquisition Program Baseline information, Regulatory status, Oversight Review, Senior Leadership Feedback, Congressional/Government Accounting Office/Inspector General interest information and program documentation information. Acquisition Visibility/Defense Acquisition Business Transformation will coordinate with the business system owner to register this system in the DITPR.

2. DASHBOARD - The Navy's Dashboard is a small effort that manually enters programmatic data into the Dashboard database consolidating common data contained in various reports to prevent duplication of data. Dashboard provides information on Navy program indicators such as contracts, cost, performance and schedule. Acquisition Visibility/Defense Acquisition Business Transformation will coordinate with the business system owner to register this system in the DITPR.

3. DPD-DW - Defense Programming Database - Data Warehouse (DPD-DW) is the Office of the Secretary of Defense (OSD), Office of Program Analysis and Evaluation single authoritative database for accessing, analyzing, and reporting Planning, Programming, Budgeting, and Execution (PPBE) data and other related information collected by OSD. The DPD-DW's primary tool for mining data and performing direct analysis is Hyperion's On-line Analytical Processing (OLAP) tool. Acquisition Visibility/Defense Acquisition Business Transformation will coordinate with the business system owner to register this system in the DITPR.

4. D-Trade - The Defense Trade Controls System (D-TRADE) is a Department of State electronic licensing system that receives and adjudicates fully electronic defense export authorization requests properly submitted by any U.S. person who is a defense trade registrant and wishes to permanently export unclassified defense articles via the Form DSP-5 or furnish defense services via Technical Assistance Agreements (TAAs). As a non-DoD Business System, this system does not have a DITPR ID.

5. ECASS - The Export Control Automated Support System (ECASS) is an electronic database of export license information that supports the Department of Commerce Bureau of Industry and Security's (BIS) export licensing process and enforcement activities. As a non-DoD Business System, this system does not have a DITPR ID.

6. IAMD Roadmap V1 - The Integrated Air and Missile Defense (IAMD) Roadmap V1 System Tracking Repository, a Joint Theater Air and Missile Defense Organization (JTAMDO) system, documents an initial baseline description of selected programs/systems that help realize the incremental attainment of specified IAMD capabilities, shows interdependencies, addresses program synchronization and interoperability, and supports IAMD Capability Area Reviews. This system is being developed under Joint System Architecture Development (JSAD) with a DITPR ID pending.

7. MMT - The Matrix Mapping Tool (MMT), formally called the Integration Framework, provides a common baseline of systems and warfighting activities from which to conduct analysis of deficiencies and redundancies. This tool is used to support Joint Integrating Concepts and Roadmaps and frame the systems engineering planning. This system is being developed under Joint System Architecture Development (JSAD) with a DITPR ID pending.

8. RCAS - The Reserve Component Automation System includes mobilization planning, office automation to USAR and ARNG units in CONUS and OCONUS. The system Includes hardware and software infrastructure, COTS and GOTS, and RCAS developed software. RCAS is being reclassified to the EIE mission area. RCAS is no longer a Transformation System. RCAS is currently in sustainment and as such, the Operations and Maintenance (O&M) funding is used for current services. RCAS is currently displayed as a business system. The OPA funding in the President's Budget 2007 through 2011 is being used for infrastructure related activities such as technical refresh of hardware and conversion to Voice-over Internet Protocol (VOIP). An exclusion letter is being drafted for RCAS recommending exclusion of RCAS from IRB certification. The Army is reviewing RCAS to determine if its capabilities warrant transferring it to our Enterprise Information Area. No decision has been made at this time.

9. The following SV-1 entities are not systems and are not reflected in the ETP:

DOORS	Dynamic Object Oriented Requirements System (DOORS) is a multi-platform, enterprise-wide requirements management tool. The Doors Document Management System, which supports the construction and maintenance of relations over document sets for applications such as requirements traceability, uses tabular presentation as the primary means of user interaction with these relations. With this tabular approach, however, simple commonly occurring operations such as hypertext navigation can appear clumsy since they involve the introduction of an intermediate tabular display.
ENTSE	Enterprise System Entity
EXTSE	External System Entity
FMSE	Financial Management System Entity
HRMSE	Human Resource Management System Entity
Industry System	Industry System - The Industry System supports the businesses providing goods and services in the private sector.
MSSMSE	Materiel Supply and Service Management System Entity
Multi CBM	Multi Core Business Mission
RPILMSE	Real Property and Installation Lifecycle Management System Entity
Unstructured Data Sources	Targeted sources of unstructured data made avaiable through the Defense Acquisition Management Information Retrieval (DAMIR) Virtual Library. Examples of these targeted unstructured data sources include file servers, web servers and Oracle databases throughout the Department of Defense enterprise.
WSLMSE	Weapon System Lifecycle Management System Entity
